MISSION STATEMENT

The purpose of the Juvenile Probation Victim Services Unit is to reduce the effects of the crime by helping the person harmed and family members to rebuild and return to their lives through support, information and referrals.

We work hard to stop further harm to the person and family already harmed. We help with problems that are caused by their sudden participation in the juvenile justice system.

All people harmed will be treated with respect and in accordance to the law allowed to choose their level of participation in the juvenile justice system.

Grievance Process

At any time, the person harmed can file a complaint regarding the services provided or the violation of their rights as outlined in the Crime Victims Act.
